May 16, 2000

STATE OF LOUISIANA
DEPARTMENT OF NATURAL RESOURCES
COASTAL MANAGEMENT DIVISION
P. O. BOX 44487
BATON ROUGE, LA 70804-4487
(225) 342-8917

CMD REVIEWER:
Jeff Thibodeaux

CUP NUMBER:
P990450(Modified)

Interested parties are hereby notified that the Coastal Management Division of the Department of Natural Resources has received the following application for a Coastal Use Permit in accordance with the State and Local Coastal Resources Management Act of 1978, as amended, (Louisiana R.S. 49, Sections 214.21-214.41), and the rules and regulations of the Coastal Resources Program.

NAME: Sorrento Pipeline Company, LLC
c/o Morris P. Hebert
Attn: Michael Capello
P.O. Box 3106
Houma, LA 70361

LOCATION: St. Charles Parish, LA; approximately 1.5 miles north of Norco, LA; Sections 32, 42, 43, 21, 22, 25, and 26; T12S-R8E; POB: Lat. 30° 03' 30", Long. 90° 25' 23"; POE: Lat. 30° 00' 56", Long. 90° 24' 15"

DESCRIPTION: Proposed installation of approximately 17,689' of a 10" flowline. Approximately 17,000 cu. yds. of native material will be temporarily displaced and used as backfill. Approximately 11.5 acres of woodland habitat may be impacted by the proposed project.**

Modification: The modification consists of the installation of four 8" pipelines instead of one 10" pipeline. The impacts to forested wetlands has increased from 14.33 acres to 15.36 acres. The permittee has changed from Tejas to Sorrento Pipeline Company, LLC.

Habitat impacts are based on available in-house data and may not represent actual conditions. Field reconnaissance may be required to verify extent of impacts.

*The official date of the beginning of the public comment period for Coastal Use Permits and Water Quality Certification applications begins on the date of publication of the notice in the official state journal (The Advocate), in accordance with the Rules and Procedures for Coastal Use Permits, §723.C.5.c. The Coastal Management Division will inform interested parties of the exact date of publication on request.

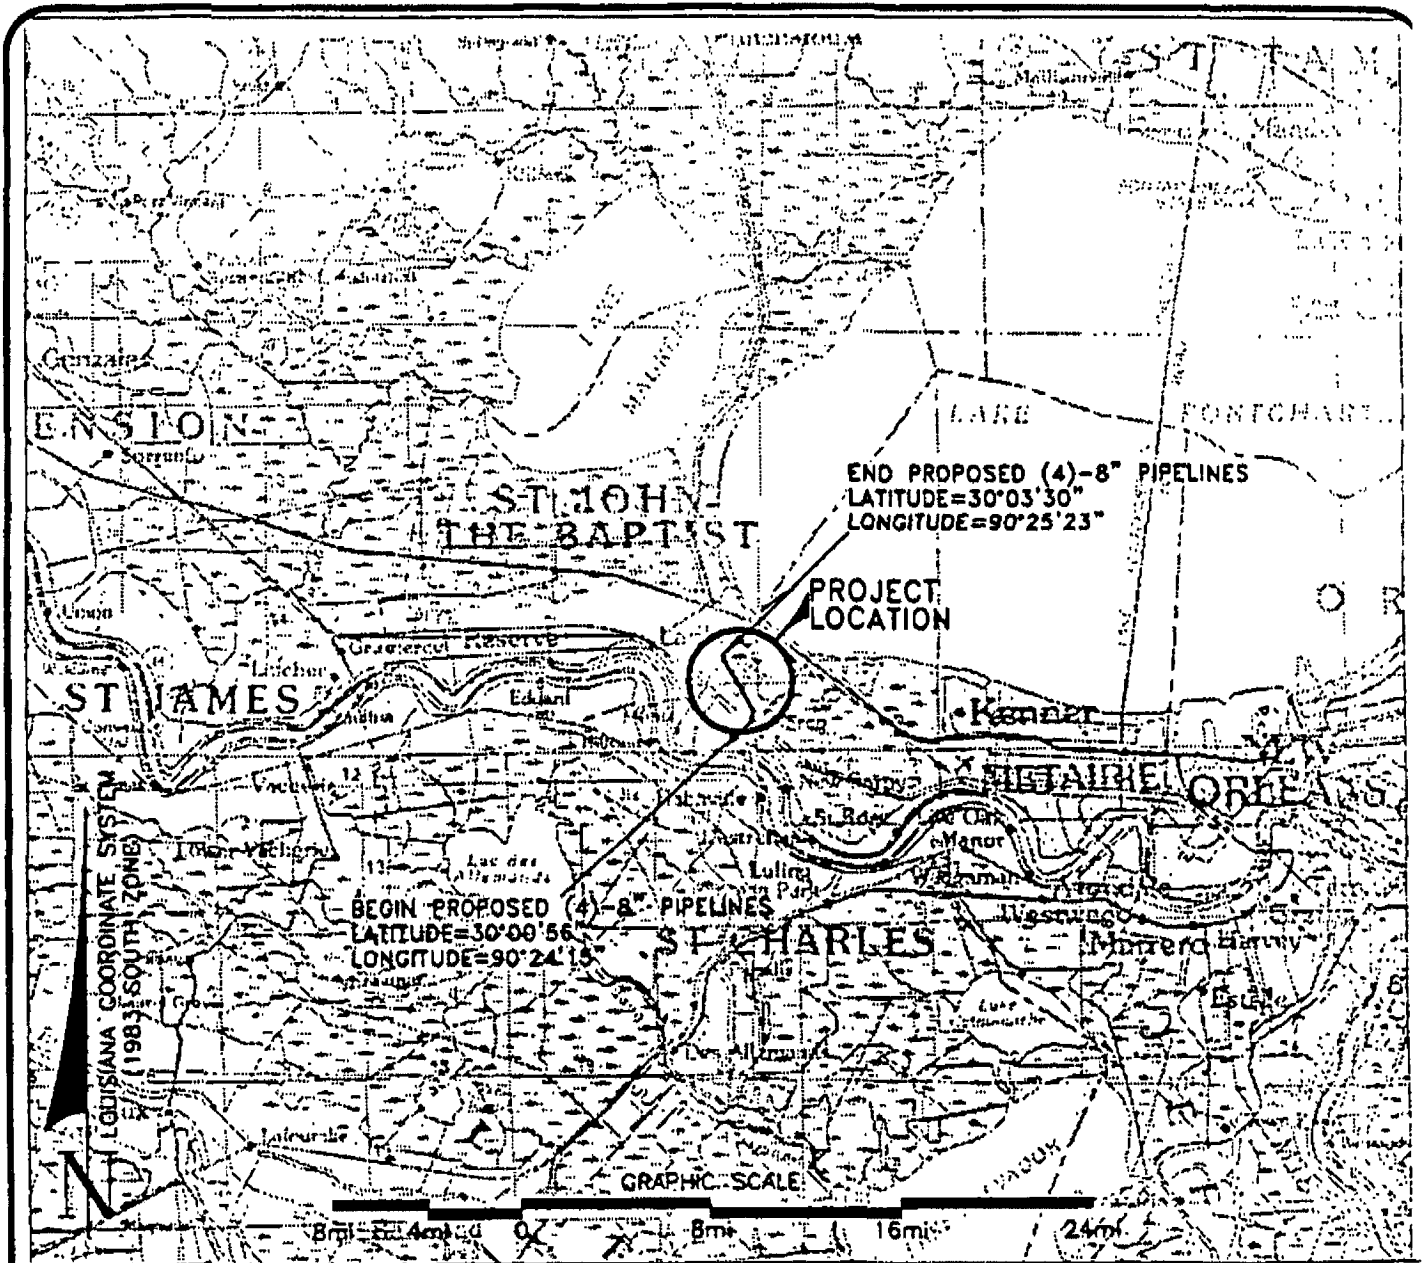

2

The decision on whether to issue a permit will be based on an evaluation of the probable impacts of the proposed activity in accordance with the state policies outlines in R.S. 49:214.22. The decision will reflect the national concern for both protection and utilization of important resources. The decision must be consistent with the State program and approved local programs for affected parishes and must represent an appropriate balancing of social, environmental and economic factors. All factors which may be relevant to the proposal will be considered; among these are flood and storm hazards, water quality, water supply, feasible alternative sites, drainage patterns, historical sites, economics, public and private benefits, coastal water-dependency, impacts on natural features, compatibility with the natural and cultural setting and the extent of long benefits or adverse impacts.

Certification that the proposed activity will not violate applicable water and air quality laws, standards and regulations will be required before a permit is issued.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearing shall state, with particularity, the reasons for holding a public hearing.

Plans for the proposed work may be inspected at the Office of Coastal Management Division, 625 North 4th Street, 10th Floor, Baton Rouge, Louisiana, (504)342-7591. Comments must be mailed with 25 days of the date of official journal publication (Baton Rouge Advocate) of this notice to Coastal Management Division, P.O. Box 44487, Baton Rouge, LA 70804-4487.
