

SECTION 00806

CHANGE ORDER

No. One (1)

DATE OF ISSUANCE November 13, 2024 EFFECTIVE DATE November 13, 2024

OWNER ST. CHARLES PARISH
CONTRACTOR TEH ENTERPRISE, LLC
Contract: ST. CHARLES PARISH WEST BANK SPRAY PARK
Project: ST. CHARLES PARISH WEST BANK SPRAY PARK
OWNER's Contract No. WBSP2112 ARCHITECT's Contract No. _____
ARCHITECT MURRAY ARCHITECTS, INC.

You are directed to make the following changes in the Contract Documents:

Description: *See attached example on how to fill in this information*

1. Delete the Following Work Items:
 - a. Credit Relocation of Infrastructure. Delete of \$50,000.00 (L.S.)

Total of Deducted Items = (\$50,000.00)

2. Add the Following Work Items:
 - a. Addition of a Pedestrian Gate on the Second Entrance to Splash Pad Addition of \$1,651.40 (L.S.).

Total of Added Work Items = (\$1,651.40)

3. Revise the Following Work Item Quantities: Not Applicable

Total of Added Work Items = \$1,651.40

Reason for Change Order: List a reason for each Line Item listed above. *See attached example on how to fill in this information*

1. Deleted Work Items
 - a. Credit Relocation of Infrastructure.
2. Add Work Items
 - a. Fire Marshal requirement for second means egress

RE: Michael Tabb

TEH Enterprise is requesting an additional 148 days for the delays caused by significant and prolonged rain events that delayed all of the site work which pushed the whole schedule because no concrete work could be done until the fill material was able to be installed and graded properly. Please see attached breakdown of all the weather days that we had on this project. All of this rain had a serious impact on our ability to raise the jobsite to the new elevations. After each rain event, we were prevented from bringing trucks onto the site to dump sand for 4-5 days until the ground dried up. We built a temporary road out of 610 stone to help alleviate this issue, but were still unable to use it while it the ground was saturated. The delay in bringing in material is ultimately what caused us to go over the contract time on this project. Additionally, after the site was filled and the concrete was all poured, we were delayed several times over the course of three weeks in July getting the epoxy flooring down in the restrooms due to the weather conditions. The epoxy flooring required a dry substrate and dry conditions since this is an indoor/outdoor facility. This delayed all of the fixtures and finishes from being installed in the bathrooms.

The data included in this attachment was pulled from The National Weather Service at <https://www.weather.gov/wrh/Climate?wfo=lix>

Please let me know if there is anymore information I can provide for this.

Thanks,
Hunter Rodriguez
