- c. Quality Level B Services (Inclusive of Level C Services)
 - 1. Designate and mark underground pipelines within the project limits using an appropriate suite of geophysical equipment.
 - 2. Mark underground pipelines at a maximum of 50-foot intervals and at all changes in direction.
 - 3. Facilities where an inductive tone may not be achieved, may be able to be located using ground penetrating radar (GPR) or an acoustic locator and will be marked as Quality Level B in these areas. When these methods are not effective, these facilities will be marked as Quality Level D or Quality Level C depending on the available information.

4. Subaqueous crossings greater than 50 feet may be designated as Quality Level D or Quality Level C depending on the available information.
5. Use of standard search protocol, using electromagnetic and GPR technologies to conduct sweeps within the project area in an attempt to determine the existence and approximate location of undocumented, abandoned, inactive, or otherwise unknown utilities.
6. Label each utility run as noted on the field sketch and use for assisting the surveyor and for quality control purposes.
7. Provide approximate electronic depth readings for each utility found, when available.
8. Investigation/designation of all other utilities will not be included.
9. Deliverables:
 - 1) One copy of the signed and sealed SUE plan set in hard copy/PDF format, depicting the location and description of all designated and surveyed utility information. This hard copy/PDF will be on 11" x 17" paper and have a base map provided by the OWNER or aerial background, utilities the OWNER's required sheet layout if provided.
 - 2) Provide a corresponding electronic file representing the SUE plan set in the preferred format of the OWNER (AutoCAD, Microstation, etc.). The signed hard copy/PDF SUE plan set shall stand as the official record of the CONSULTANT's work for this project.

d. Quality Level A Services (Inclusive of Level B Services)

1. Determine the exact location and elevation of critical utilities which may conflict with the proposed construction or design as determined by the OWNER.
2. Perform up to thirty-four (34) Test Holes on pipelines crossing each canal, as requested by the OWNER. Each test hold will be performed at the closest accessible location to the drainage canals. Due to the unexpected depth of the pipeline test holes, the production rate per day is anticipated to be no more than 2 test holes per day. Vacuum Excavation will be performed utilizing non-destructive air-and/or water-assisted excavation equipment to expose the utilities at specific points which are then tied down by survey.
3. Excavation of Test Holes:
 - 1) Clear the Test Hole area of surface debris.
 - 2) Excavate the Test Hole. The nominal diameter of the Test Hole shall not exceed 15 inches (375 millimeters) unless otherwise approved.

- 3) Expose the utility only to the extent required for identification and data collection purposes.
 - 4) Avoid damage to lines, wrappings, coatings, cathodic protection or other protective coverings and features.
 - 5) Hand-dig as needed to supplement excavation and to ensure safety.
 - 6) Revise the Test Hole location as necessary to positively expose the utility.
 - 7) Store excavated material for re-use or disposal at an approved location near the project, as appropriate.
4. Collection, Recording, and Presentation of Data: Measure and or/record the following information on an appropriately formatted Test Hole data sheet that will subsequently be sealed and dated by the CONSULTANT.
- 1) Difference in elevation of top and/or bottom of the utility and the above ground mark to a vertical accuracy of +/- 0.05 feet (15 millimeters).
 - 2) Field sketch showing horizontal location referenced to a minimum of two (2) swing ties to physical structures existing in the field.
 - 3) Approximate centerline bearing of utility line.
 - 4) Outside diameter of pipe, width of duct banks, and configuration of multi-conduit systems, when reasonably ascertainable.
 - 5) Utility structure material composition, when reasonably ascertainable.
 - 6) Other pertinent information as is reasonable ascertainable from test hole, such as utility owner.
5. Site Restoration:
- 1) Replace bedding material around exposed utility lines.
 - 2) Backfill and compact the excavation in a manner acceptable to OWNER. Re-use excavated material with appropriate compaction.
 - 3) As applicable, provide permanent pavement restoration within the limits of the original cut using materials, compaction, and pavement thickness similar or equal to that found.
 - 4) For excavations in unpaved areas, restore disturbed area as nearly as practicable to pre-existing conditions.
 - 5) Furnish and install permanent surface marker (e.g., P.K. nail, peg, steel pin or hub) directly above the centerline of the utility.
6. Information gathered by the CONSULTANT will be shown on a Test Hole data sheet and on the drawings provided. The x, y, z of the Test Hole location and the Test Hole number will be shown on the drawings. If the utilities are over 10 feet deep, they may not be found using the non-destructive vacuum excavation techniques for Test Holes.
7. Deliverables:
- 1) All Test Holes will be shown on the deliverable drawing, and CONSULTANT will provide signed and sealed individual test hole data

forms detailing all pertinent utility information for all test holes completed.

The contractor acknowledges that this list is not exhaustive and may not contain all applicable rules, laws, and regulations. The contractor is deemed to have read and understood all requirements for the project and the requirements set forth in this document.

1. EQUAL EMPLOYMENT OPPORTUNITY

(applicable to contracts and subcontracts over \$10,000)

In conformance with the regulations of the Secretary of Labor at 41 C.F.R. Part 60-1.4 "Equal Opportunity Clause," during the performance of this contract, the contractor agrees as follows:

1. The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.
2. The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.
3. The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.
4. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

5. The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.
6. The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.
7. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.
8. The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided*, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

2. CERTIFICATION OF NONSEGREGATED FACILITIES

The contractor may neither require such segregated use by written or oral policies nor tolerate such use by employee custom. This obligation extends to all contracts containing the equal opportunity clause regardless of the amount of the contract. The contractor agrees that a breach of this certification is a violation of the equal opportunity clause of this contract. As used in this certification, the term "facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms, and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas,
