

2023-2-ORD requested by Matthew Jewell, Parish President / Dept. of Public Works to amend the Subdivision Regulations of 1981 to update the requirements for street light fixtures.

Michael Albert – So this is actually a pretty simple amendment we did this a number of years back where we updated to a current standard most of the subdivisions are doing this anyway at the moment the parish is going to a more uniform LED standard across I've been in communication with the office of contract monitoring and the parish engineers with the spec in here so we ask for your support and this will be included in all future construction applications for subdivisions, so you will see in the future.

The public hearing was open and closed, no one spoke for or against.

Commissioner Petit – I guess one for me, is it's mark to strike out some very very specific requirements and replace them with some additionally very specific requirements on wattages and lumens.

Mr. Albert – I ask this question as well this was the requested verbiage.

Commissioner Petit – Thank you.

Commissioner Keen made a motion to consider, seconded by Price.
