Appendix A. Section XV. - Amendment procedure

D. Rezoning guidelines and criteria: The proponent for a change should present reasonable factual proof that two or more of the following criteria are met:

1. The proposed rezoning conforms to land development pattern established by the St. Charles Parish Comprehensive Plan Future Land Use Map and does not create a spot zone that is incompatible with the surrounding neighborhood.
2. The Land-use pattern or character has changed to the extent that the existing zoning no longer allows reasonable use of the applicant's property, and that the proposed zoning does. In order to determine what is reasonable use of the property, the proponent for the zoning change should consider one or more of the following:
 - a. Consideration of uses on adjacent properties that would limit the use of the site under consideration.
 - b. Consideration of unique or unusual physical or environmental limitations due to size, shape, topography or related hazards or deficiencies.
 - c. Consideration of changes in land value, physical environment or economic aspects which can be shown to limit the usefulness of vacant land or buildings.
3. Potential uses permitted by the proposed rezoning will not be incompatible with existing neighborhood character nor will they overburden public facilities and infrastructure.

The Planning Staff shall base rezoning analyses on these criteria but shall not be prohibited from factoring unique circumstances of the application into the analysis. The Planning and Zoning Commission may state in its recommendations to the Council: its concurrence with, or rejection of, any or all of the proponents' case for the suggested amendment, and/or its position relative to proponents' statements on the case. Planning Staff analyses and recommendations shall be forwarded to the Council along with the Commission's recommendations.

E. Rezoning approval criteria: Before the Council votes to approve a rezoning, there should be reasonable factual proof by the applicant that:

1. The proposed map amendment is in compliance, or is not in conflict, with the goals and recommendations of the St. Charles Parish Comprehensive Plan and Future Land Use Map, also
2. The proposed map amendment does not negatively impact the health, safety, and welfare of the community.

REZONING GUIDELINE & CRITERIA EVALUATION

1. *The proposed rezoning conforms to the land development pattern established by the St. Charles Parish Comprehensive Plan Future Land Use Map and does not create a spot zoning that is incompatible with the surrounding neighborhood.*

The Future Land Use Map designates the subject property as Wetlands. The Comprehensive Plan only recommends the Wetlands zoning district under this designation, envisioning low-impact uses associated with wetlands and flood-prone areas.

The O-L zoning district is not recommended under the Wetlands designation. The request is not consistent with the Future Land Use Map.

The request does not meet the first guideline.

2. *The Land-use pattern or character has changed to the extent that the existing zoning no longer allows reasonable use of the applicant's property and the proposed zoning does.*

This area of Luling experienced significant residential subdivision development beginning in the late 1950s and continuing through the 1980s, but subdivision development north of the Blouin Canal has since slowed. Despite the potential for residential subdivision expansion via extensions of Diane Drive and Terri Drive, the subject site has remained vacant and wooded.

The presence of wetlands establishes environmental constraints, limiting the suitability for residential development typical of the R-1A zoning district, where lots as small as 6,000 sq. ft. are permitted. In contrast, the proposed O-L zoning district requires a minimum lot size of 20,000 square feet, resulting in a lower-density development pattern that is more reasonable given the physical limitations of the property.

Additionally, approximately four acres within the site were rezoned from R-1A to O-L in 2020 (2020-20-R; 20-12-8), resulting in a split-zoning. The current request would extend O-L zoning uniformly across the site.

The request meets the second guideline.

3. *Potential uses permitted by the proposed rezoning will not be incompatible with existing neighborhood character nor will they overburden public facilities and infrastructure.*

Uses permitted within the O-L, Open Land District will not be incompatible with the existing neighborhood character nor will they overburden public facilities and infrastructure.

Agricultural uses are permitted, which could conflict with traditional single-family neighborhoods, but the O-L district is typically developed with site-built homes on larger, 20,000+ sq. ft. lots. Additionally, a portion of the subject tract immediately adjacent to the Lagattuta Subdivision is currently zoned O-L (2020-20-R; 20-12-8). By expanding the O-L district across the entire site, any potentially incompatible uses may be located further from the adjacent neighborhood, with a dense wooded buffer in-between.

Representatives of Public Works, Wastewater, and Waterworks offered no objections. The O-L zoning district permits development at a substantially lower density than the existing R-1A zoning district. The rezoning would not create demands on public infrastructure beyond those that could already occur under the existing zoning classification.

The request meets the third guideline.

DEPARTMENT RECOMMENDATION

Approval, based on meeting the second and third rezoning criteria.

This request will be forwarded to the Parish Council for a second public hearing with the Planning Commission's recommendation.
