

Montz Compressor Station Traffic Control Plan

The following conditions are presented for consideration in regard to the special use permit application by Gulf South Pipeline Company, LP for the purpose of the construction of the Montz Compressor Station in St. Charles Parish, LA.

- Gulf South Pipeline Company, LP (Gulf South) will escort all oversized loads to the Montz Compressor Station facility (referred to below as "site").
- Gulf South will place personnel on Evangeline Rd at each construction entrance for flagging and traffic control during working hours.
- Gulf South will coordinate with local schools to ensure no heavy vehicle traffic or equipment delivery along Evangeline Rd. is scheduled during school bus pick-up and drop-off times .
- Construction laborers will be bused from a central location (to be determined) to the extent practical. Contractor vehicles, tool trucks, welding and equipment trucks, crane trucks, and other vehicles necessary for construction and installation of the facility will be allowed access to the site. Gulf South Employees and inspection staff will be allowed the access the facility using personal or company vehicles.
- Traffic will be limited to access the site from Airline Highway (Highway 61) to Evangeline Rd only. Access from River Rd. to the site will be restricted (See attached Traffic Control Plan Diagram)
