Chris,

In case you are not aware, an 18 wheeler flipped over in the bad curve on the WPA road. Had the road blocked for the longest. I have received a request that I ask the state to do something to fill in the inside curve sort of as shown on the attached. The curve is hazardous for any vehicle pulling any trailer. One has to stop and let traffic clear so that one can swing into the other roadway when heading westbound.

Please see what can be done to address this and let me know.

Thanks
