CHANGE ORDER

No. 01

DATE OF ISSUANCE: June 11, 2025

EFFECTIVE DATE 7/22/25

OWNER: St. Charles Parish

CONTRACTOR: Sealevel Construction, Inc.

Contract: Sunset Screen Cleaner

Project: Sunset Screen Cleaner

OWNER'S Contract No.: P080905-11C

ENGINEER'S Contract No.: 10475-0972

ENGINEER: Burk-Kleinpeter, Inc.

You are directed to make the following changes in the Contract Documents:

Description:

1. Delete the Following Work Items:

- a. No work items to be deleted.

Total of Deducted Items = (-\$0.00)

2. Add the Following Work Items:

- a. New Contract Item #CO1-A: Additional Work for Precast Bridge
Addition of \$ 56,185.00 (L.S.). See attached cost estimate for details.
- b. New Contract Item #CO1-B: Additional Miscellaneous Steel
Addition of \$ 5,620.00 (L.S.). See attached cost estimate for details.
- c. New Contract Item #CO1-C: Additional Bond
Addition of \$ 2,065.00 (L.S.). See attached cost estimate for details.

Total of Added Work Items = (+\$63,870.00)

3. Revise the Following Work Item Quantities:

- a. Contract Item #4: 16" Prestressed Concrete Piling
The quantity is to be changed from 6,000 to 6,710 Linear Feet. (+\$ 85,200.00)
- b. Contract Item #12: Sheet Pile Permanent
The quantity is to be changed from 11,400 to 11,665 Square Feet. (+\$ 19,875.00)

Total of Change in Work Items Quantity = (+\$105,075.00)

Reason for Change Order: List a reason for each Line Item listed above.

1. Deleted Work Items

- a. No work items were deleted.

2. Add Work Items

- a. The addition of fourteen concrete bridge piles increased the number of pile to cap connections that needed to be grouted.
- b. The additional length of the southeastern wingwall required additional wale beam length and connector rod length.
- c. The additional scope items increased the project cost and required an increase in project bonding costs.

3. Revise Work Item Quantities

- a. The Pile Load Test did not provide the $FS=2.0$ required for design. It was determined that adding piles was the most cost-effective solution versus casting new test piles and performing a second pile load test. Fourteen additional piles were added to the project increasing the total length of 16" Prestressed Concrete Piles from 6,000 linear feet to 6,710 linear feet.
- b. With the addition of fourteen concrete piles, the southeastern bridge wingwall needed to be rerouted to avoid conflicts. The rerouting of the wingwall increased the square footage of the wingwall from 11,400 to 11,665 square feet.
- c. The additional prestressed piles, the additional pile connections, and the additional sheet pile/wale beam will increase the construction time by 12 days.
