New Recycle Sites 2019

- East Bank Bridge Park

30 Yard Recycle Slot Roll Off Containers

Slots do not allow for the dumping of non recyclable items as those items are typically too large to fit into the dumpster container

Using the main Recreational sites of the East Bank and West Bank Bridge Park has deterred the illegal dumping

New Rolloff Recycle

- 
- **“New rules place restrictions on global plastic scrap trade.. Washington, says the effort “will hamper the world’s ability to recycle plastic material,”**

Hundreds of US cities are killing or scaling back their recycling programs

China placed a ban and stopped importing most plastic and papers & scrap metals from other countries. Now, many cities in the US are facing a recycling crisis.

A major processor of household recyclables in the New Orleans area is getting out of the business, effective May 17, 2019. That will increase haulers' costs when they start diverting their trucks 90 miles away to the company's plant north of Baton Rouge.

Republic Services Inc.'s sorting plant at 804 L&A Road in Metairie might be the only local one still accepting the plastics, paper and metal cans, said the Phoenix-based company Friday May 3, 2019. But will stop receiving household discards in two weeks, contract by contract.

Republic Services CEO says recycling has become a 'broken' system

- CNBC's Jane Wells reports from a Republic Services facility on the "broken" recycling business as the commodity value of recyclables drop.

Hauling to Baton Rouge Pricing:

- Pelican Waste our current provider, their price quote from Republic Services \$714 per load
- Republic Services price quote to parish directly \$624 per load and \$222 per ton sorting fee totaling \$846 per haul

2018 Annual Budget = \$36, 000

2019 Current Budget cost due to price increases
\$46,700

Unfortunate recommendation to temporary suspend all recycling operation/drop sites in St. Charles Parish.
