RE: Permit Application for Mississippi River Ventures, LLC
Midstream Transfer Facility

The above reference applicant is located on the Mississippi River at mile marker 115.5 left descending bank, St. Rose. This permit is completely contained within the Mississippi River and therefor does not appear before the St. Charles Parish Coastal Zone Advisory Committee. The project does not effect wetlands in St. Charles Parish. Based on the proximity of the proposed facility to a residential neighborhood and air quality issues associated with mid-stream transfer, the CZM Section recommends that a letter of **OBJECTION** be sent in regard to the matter.
