ARTICLE I **PURPOSE AND IDENTIFICATION**

A. Purpose.

The Purpose of this Agreement is to set forth the subaward terms, conditions, and responsibilities to be performed by the PARISH and the STATE in the construction of the Paradis Canal Gate Project.

B. Project Identification.

For the purpose of administration, identification and record keeping, State Project Number **BA-0209** is assigned to this Project. This number will be used to identify all Project costs.

C. Subaward Information.

The information required by the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards ("Uniform Guidance") at 2 C.F.R. § 200.331(a)(1) is attached hereto as **Attachment A**. The Uniform Guidance also requires that if any of these data elements change, the pass-through entity must include the changes in subsequent subaward modification. When some of this information is not available, the pass-through entity must provide the best information available to describe the federal prime award and subaward.

ARTICLE II **PROJECT DESCRIPTION**

The objective of the Paradis Canal Gate Project (**BA-0209**) is to construct a coastal flood protection project, the Paradis Canal Gate, within the Barataria Basin, which will provide crucial flood protection by blocking storm surge as a key component of the West Bank Hurricane Protection Levee (WBHPL). The Project design goal is to provide crucial flood protection by blocking storm surge. As part of the overall levee system, it is necessary to install the proposed Paradis Canal Gate located on the border of Paradis and Boutte, because without it the system is vulnerable to water rushing through leaving the possibility of the area to be inundated with high levels of water leading to flooding and potential economic losses. As such, for purposes of Section 4.1.1 of the RESTORE Council's State Expenditure Guidelines ("SEP Guidelines"), the primary eligible activity of the Project is to provide coastal flood protection (Eligible Activity (7)). Construction of the Paradis Canal Gate is planned as part of Phase I of the four-phase WBHPL project. The WBHPL is a 33-mile earthen levee alignment that begins with the Sunset Levee on the western flank in Des Allemands and extends to the Davis Pond Freshwater Diversion West Guide Levee to the east in Luling. The WBHPL includes the proposed Paradis Canal Gate, which is necessary to address both the interior drainage and the resulting encapsulated wetlands ecosystem. Design on this Project has been substantially completed. The

measure of success for the Paradis Canal Gate project include: 1. Awarding construction contract; 2. Construction mobilization; and 3. Issuing Substantial Completion

For the purposes of the RESTORE Act and Section 4.2.2 of the RESTORE Council's SEP Guidelines, this project is considered an infrastructure project. CPRA is providing, through RESTORE Spill Impact Component funding, an amount not to exceed \$2,540,724 for construction of this Project. It is estimated that 100% of these requested funds will go toward implementation. Funding of post-construction activities, including without limitation, monitoring and OMR&R, will be the 100% responsibility of the PARISH. It will be required that the engineer overseeing the construction of the Project certify that the Project is built to specification and the invoices are accurate. This process will allow CPRA to monitor and measure the success of this Project.

The Paradis Canal Gate will include:

1. A flood control structure (t-wall to elev.+14.5, vertical gate opening, and sluice gates)
2. Tie-ins to the existing levees (Sunset phase levee on the west side of the Paradis Canal and Magnolia Ridge phase levee on the east side)
3. An extension of the access roadway from the Magnolia Ridge Pump Station
4. 4" unreinforced concrete and sheet pile for erosion control and stability.

The Construction of the Paradis Canal Gate will consist of the following:

1. The full scope and project responsibilities of the work described in this Agreement are provided in Article IV and the scope of work, which is attached hereto as **Attachment B**.
2. Land rights –
 - a. PARISH will determine the necessary land rights, easements, rights-of-way, relocations, disposal areas, and servitudes (LERRDS) needed for construction to the satisfaction of CPRA. PARISH understands and agrees that these costs are not eligible for reimbursement under this Agreement and that PARISH will be responsible for determining the manner and method by which they are acquired and will be 100% responsible for any Project cost associated with these efforts.
 - b. PARISH is responsible for 100% of any Project cost associated with acquisition of LERRDS, whether permanent or temporary in nature. PARISH understands and agrees that these costs are not eligible for reimbursement under this Agreement. PARISH also understands and agrees that under Section 1607 of the RESTORE Act, RESTORE funds can only be used to acquire land or interests in land by purchase, exchange or donation by a willing seller and such acquisition(s) shall be all in accordance with the applicable provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Public Law 91-646, as amended (42 U.S.C. 4601-4655), and the Uniform Regulations contained in 49 C.F.R. Part 24, and the party acquiring the real estate interest shall inform all affected persons of applicable benefits, policies, and procedures in connection with said Act.
3. Access Roadways - Planning, design & construction of any access roads that may be necessary.
4. Temporary Structures - Engineering and design of excavation and maintenance of temporary cofferdam and dewatering system.
5. With regard to the scope of this Agreement, PARISH will be responsible for investigation, study, cleanup, and response determined to be necessary relative to any hazardous, toxic or radioactive waste material, whether regulated by a local government, state government or the Federal Government and for 100% of any Project cost associated with such investigation, study, cleanup, or response. PARISH

- understands and agrees that these costs are not eligible for reimbursement under this Agreement.
6. PARISH is responsible for acquiring any and all local, state, and federal permits required for construction of the project including but not limited to, Letters of No Objection, Coastal Use Permits, and Section 408 permits. PARISH shall submit copies of applicable permits to CPRA prior to initiating a regulated/permitted construction activity.
 7. Development of OMRR&R - The PARISH shall develop a specific operation and maintenance, repair, rehabilitation and replacement (OMRR&R) plan for the Paradis Canal Gate Project, under which plan PARISH will be responsible for 100% of the channel dredging and OMRR&R for the Paradis Canal Gate Project.
 - a. The OMRR&R Plan must be approved by CPRA at the completion of construction.
 - b. The OMRR&R plan and the conditions set forth therein shall be incorporated into this Agreement as if written herein and the terms therein shall survive the termination or expiration of this Agreement for any reason. Failure to operate in accordance with the established OMRR&R Plan shall be considered a breach of contract for which CPRA may seek any remedy available under this Agreement or any other law, rule, or regulation.

ARTICLE III **PROJECT FUNDING**

This Agreement shall be administered as follows:

- A. The STATE, through CPRA, shall provide to the PARISH, a maximum of **\$2,540,724** (“Maximum CPRA Contribution”) in RESTORE Spill Impact Component funds, which will be awarded on the basis of a federal grant from the Gulf Coast Restoration Trust Fund (the “Grant Funds”). The Grant Funds consist of the Gulf Coast Ecosystem Restore Council Parish Matching Award to complete construction of the Paradis Canal Gate (the “Parish Matching Grant Application and Award”, Federal Award Identification Number GNTSP19LA0070, which is hereby incorporated by reference into this Agreement)). The STATE will reimburse PARISH up to 50% of the costs incurred by PARISH on each invoice. The PARISH and any of its subrecipients/consultants/contractors/subcontractors paid under this Agreement shall maintain all documents, papers, books, field books, accounting records, appropriate financial records and other evidence, including electronic records that are pertinent to the Grant Funds, pertaining to costs incurred for the Project and shall make such materials available for inspection at all reasonable times during the contract period and for a five (5) year period from the date of reimbursement under the Project for inspection by the STATE, the Inspector General and/or the Legislative Auditor, the United States Department of the Treasury's Office of Inspector General (Treasury OIG), the Government Accountability Office (GAO) and the RESTORE Council; however, prior to disposal of any Project data for the Project, the PARISH shall obtain prior written approval from the STATE, through CPRA.

Each Party acknowledges and agrees that the Legislative Auditor of the State of Louisiana, the auditors of the Office of the Governor, Division of Administration, Treasury OIG, the GAO and the RESTORE Council shall have the authority to audit all records and accounts of the STATE and the PARISH which relate to this Agreement, and those of any subcontractors which relate to this Agreement. Any audit shall be performed in accordance with La. R.S. 24:513 *et seq.* and/or 2 C.F.R. Part 200, Subpart F "Audit Requirements", and 31 C.F.R. §§34.508 and 34.805, as applicable. This right also includes timely and reasonable access to PARISH's personnel for the purpose of interview and discussion related to such documents. This right of access shall continue as long as records are required to be retained.

The STATE and the PARISH, and any subrecipients/consultants/contractors/subcontractors paid under this Agreement shall maintain all books and records pertaining to this

Agreement for a period of five (5) years after the date of final payment under the prime contract and any subaward/contract/subcontract entered into under this Agreement.

The purpose of submission of documentation by STATE to the PARISH, or by the PARISH to the STATE as required by this Agreement is to verify that such documentation is being produced, to provide evidence of the progress of the Project, and to verify that the expenditure of Project funds occurs in accordance with the terms of this Agreement. As between the STATE and the PARISH, STATE assumes no responsibility to provide extensive document review for any documents received from PARISH or its subrecipients/consultants/contractors/subcontractors or to determine the completeness or accuracy of any such documentation. The PARISH and its subrecipients/consultants/contractors/subcontractors shall also be responsible for, and assure, compliance with all applicable local, state and federal statutes, laws, rules, and regulations in carrying out any of its obligations under this Agreement.

In addition to financial and performance reports required by 2 C.F.R. Part 200, PARISH shall assist the CPRA with providing the following:

- (ii) Any reports as prescribed by the RESTORE Council or the U.S. Department of Treasury in accordance with 31 C.F.R. §34.506 and/or as required in any Special Award Conditions associated with the award of the Grant Funds.

PARISH shall be responsible for monitoring any lower tier subrecipients, consultants, contractors, and subcontractors to ensure that work performed in connection with this Agreement comports with the Agreement's terms and all applicable local, state and federal laws, rules, regulations, and guidelines.

ARTICLE VIII **TERMINATION FOR CAUSE**

The STATE may terminate this Agreement for cause based upon the failure of PARISH to comply with the terms and/or conditions of the Agreement; provided that the STATE shall give the PARISH written notice specifying the PARISH'S failure. If within thirty (30) days after receipt of such notice, the PARISH shall not have either corrected such failure or, in the case which cannot be corrected in thirty (30) days, begun in good faith to correct said failure and thereafter proceeded diligently to complete such correction, then the STATE may, at its option, place the PARISH in default and the Agreement may terminate on the date specified in such notice.

The PARISH may exercise any rights available to it under Louisiana law to terminate for cause upon the failure of the STATE to comply with the terms and conditions of this Agreement; provided that the PARISH shall give the STATE written notice specifying the STATE'S failure and providing a reasonable opportunity for the STATE to cure the defect.

In the event that either Party elects to terminate this Agreement pursuant to this Article, the Parties agree to participate in a final cost accounting as of the date of termination and in accordance with the terms and conditions herein. In the event that either Party elects to terminate this Agreement pursuant to this Article, the Parties agree to participate in a final cost accounting as of the date of termination and in accordance with the terms and conditions herein. The obligations under this Article shall survive termination or expiration of this Agreement for any reason.

ARTICLE X
TERMINATION DUE TO RESTORE FUNDING

The continuation of this Agreement is contingent upon the appropriation and release of sufficient funds from the RESTORE Council to the STATE to fulfill the requirements of this Agreement, including any funds subject to a Special Award Condition. Failure of the RESTORE Council to approve and provide an adequate budget to the STATE for fulfillment of the Agreement terms shall constitute reason for immediate termination or suspension of the Agreement.

ARTICLE XI
ALLOWABLE COSTS

Costs that result from obligations incurred by PARISH during a suspension or after termination are not allowable unless the STATE expressly authorizes them in writing in the notice of suspension or termination or subsequently. However, costs during suspension or after termination are allowable if: (1) the costs result from obligations which were properly incurred by PARISH before the effective date of suspension or termination, and are not in anticipation of it; and (2) the costs would be allowable if the grant award was not suspended or expired normally at the end of the period of performance in which the termination takes effect.

PARADIS CANAL STRUCTURE – PROJECT SUMMARY AND SCOPE OF WORK

The West Bank of the St. Charles Parish is subjected to coastal flooding, usually associated with infrequent hurricanes and tropical storms. The official hurricane season extends from June 1 through November 30 (six months of the year). An approaching hurricane can drive tides to elevations in excess of +4. Whereas a great deal of rain accompanies hurricanes, it is usually in the range of a 10-year return event, rather than a 100-year return event. Tides in excess of elevation +2 can also occur without significant rainfall. A tide elevation of +1 to +2 is experienced most of the year as southerly winds elevate tide levels. At times, the tide level almost reaches Highway 90. To prevent the area from the flooding St. Charles Parish has permitted with DNR/COE for the placement of the levee, at present, to an elevation of +7.5' with three new pump stations, and flood protection T-walls at the existing pump stations & gas pipe line crossings. The levee project is called "West Bank Hurricane Protection Levee (WBHPL)", has been divided into four phases: Magnolia Ridge (Phase I), Willowridge (Phase II), Ellington (Phase III), and Sunset (Phase IV).

The WBHPL stretches from the West Guide Levee of the Davis Diversion to the Paradis Canal at the Sunset Drainage District Levee. This levee system will protect the Magnolia Ridge, Mimosa Park and Willowdale/Willowridge areas from the backwater flooding and tidal surges from Lake Cataouatche and Salvador.

The subject project "Paradis Canal Gate" is located in the Magnolia Ridge (Phase I) of the WBHPL. Magnolia Ridge Levee (elev. +7.5') extends from the Ellington (Phase III) levee at Holder Estates in a southerly direction to its intersection with the Paradis Canal at the Sunset Drainage District Levee. The Magnolia Ridge phase improvements also include a new Pump Station (500 cfs) with a detention pond/sump area for storage. The Magnolia Ridge Pump station will combine flows from the Magnolia Ridge area, overflows from the Paradis Swamp, and Paradis Canal and pump them into the marshland south of the pumping station.

As a part of the overall levee system, it is necessary to install a gated structure within the Paradis Canal to prevent backwater flooding through this opening. As approved by the DNR/COE, a weir structure will be constructed immediately adjacent to the detention basin for the pump station. This structure will be a low level earthen dam which will serve to prevent storm water flow out of the Paradis swamp at an elevation of +2. Additionally, this weir structure has a provision for temporary aluminum weir channel to prevent circulation of water during high tides to elevation +3.0 when the Paradis gate structure is open. No Biological investigation has been performed for the Paradis Swamp; however, water surface elevation of +2.0 should be adequate to maintain the vegetation in the Paradis Swamp. The elevation of the berm around the Hahnville High School appears to have gaps less than elevation of +2.0 and should be raised to protect the school from higher water levels from the swamp. Based on the previous discussions with St. Charles Parish and their requirements, the Paradis structure was designed to provide a capacity of 1,200 cfs assuming at 3 ft/sec. Because this canal is subjected to some boating activity, the structure was designed to accommodate boat passage. The Paradis Canal Structure will be normally (rainfall storm up to a 10-year event and tides below elev. +2.0) open and will only be closed during the emergency conditions as defined in the operation plan of the DNR/COE permit.

Specifically, the construction scope of work consists of a new flood control structure including a vertical lift gate, screw jack system, reinforcing concrete T-Walls supported on steel H-Piles, Levee Tie-Ins and electrical power distribution. Approximately 8,500 cubic yards of excavation required of which approximately 7,200 cubic yards will be placed onsite and approximately 1,300 cubic yards will be hauled offsite. Approximately 1,000 cubic yards of concrete, and 190 TONS of rip rap will be hauled in and used as fill.

All regulatory permits have been acquired for the project, and compensatory mitigation for the project footprint has been completed. According to the State of Louisiana Department of Natural Resources Coastal Use Permit, Item 11(f),

"To mitigate for the unavoidable loss of ±2.5 acres of Bottomland Hardwood habitat and 1.2 acres of Cypress Swamp habitat and 0.8 acres of Fresh Marsh habitat, the Office of Coastal

Management received documentation dated May 28, 2014 that the permittee has purchased 5.2 acres of Bottomland Hardwood habitat credits and 0.8 acres of Cypress Swamp habitat credits from the Enterprise Woodlands Mitigation Bank. This purchase will satisfy the requirements for compensatory mitigation and allow permittee to conduct the activities authorized under this permit."

The limits of construction have been clearly identified on the construction plans to alert the contractor to his physical constraints when laying out the project and mobilizing his equipment and materials. The current limits of construction were sequenced with the required work for the project and will be able to be performed within the current footprint. Equipment and laydown areas have been identified within the project footprint.

A detailed sequence of construction has been developed and included in the construction plans, involving a cofferdam system. Sheet piles utilized for the dewatering of the site may be stacked and will be installed early in the project. H-Piles may be stored in the vicinity of the levee embankment which will be constructed during the latter part of the construction sequence. The scope will include reinforcing for the floodwall which may be stored along the roadway or adjacent to the piles.

Excavated material that is deemed suitable by the Parish's designated Testing company will be stockpiled in a designated area and shall become the property of St. Charles Parish. Excavated material not to be used as backfill or deemed unsuitable by the Engineer and Parish will be hauled offsite to a State-approved disposal facility for proper and legal disposal. Per the specifications, *"All trucks hauling unsuitable material shall be placarded, numbered, and measured to determine their carrying capacity and shall be inspected and measured by a representative of St. Charles Parish prior to leaving the site."*

Additionally, the specifications require that *"During the excavation operations as described in scope of this section, St. Charles Parish's Testing Company shall test the excavated material to ensure its suitability for placement in the levee section, in accordance with specifications. If excavated material is deemed unsuitable, it shall be removed from the site by the contractor and disposed of legally and properly."*

Detailed erosion and sediment control measures have been included in the contract specifications. The Contractor must prepare and adhere to a Stormwater Pollution Prevention Plan (SWPPP) which is to be approved by St. Charles Parish and the Louisiana Department of Environmental Quality.

Code of Federal Regulations

Title 2 - Grants and Agreements

Volume: 1

Date: 2014-01-01

Original Date: 2014-01-01

Title: Appendix II to Part 200 - Contract Provisions for Non-Federal Entity Contracts Under Federal Awards
Context: Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, CHAPTER II - OFFICE OF MANAGEMENT AND BUDGET GUIDANCE, - Reserved, PART 200 - UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS.

Pt. 200, App. II

Appendix II to Part 200—Contract Provisions for Non-Federal Entity Contracts Under Federal Awards

In addition to other provisions required by the Federal agency or non-Federal entity, all contracts made by the non-Federal entity under the Federal award must contain provisions covering the following, as applicable.

(A) Contracts for more than the simplified acquisition threshold currently set at \$150,000, which is the inflation-adjusted amount determined by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) as authorized by 41 U.S.C. 1908, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate.

(B) All contracts in excess of \$10,000 must address termination for cause and for convenience by the non-Federal entity including the manner by which it will be effected and the basis for settlement.

(C) Equal Employment Opportunity. Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

(D) Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of \$2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor.
