GeoNet Towers

GeoNet Towers has applied to the state and federal government to locate a cell tower between Willowdale Boulevard and the Davis Pond Diversion Project, south of Highway 90. Specifically the project is about 550 feet east of the Corner of Willowdale Boulevard and Highway 90. This is the beginning of their approval process to place a tower on this site, they will also need a rezoning and a Special Permit from St. Charles Parish, but they cannot proceed with either without their wetland permits. Two citizens of Willowdale appeared at the CZAC meeting to express their concerns about this project. Their issues were mainly development oriented, but aesthetics and wastes were raised as environmental concerns. Due to the minimum impact of the project the Coastal Zone Management Section recommends a letter of **NO OBJECTION** be sent. The motion was made to send a letter of no objection from the Coastal Zone Advisory Committee, but FAILED due to a lack of votes required to affirm. Therefor the CZAC has **NO RECOMMENDATION** to this permit.
