RE: Permit Application for Total Transportation, Inc.
Gemini Rig
Discharge Permit in Mississippi River
Destrehan, Louisiana
DEQ# LA 0090573

The above reference applicant is located on the Mississippi River between mile marker 116 and 121 left descending bank, Destrehan. This permit is a replacement permit for an existing tank storage facility. This discharge already exists and is not an increase. According to the Louisiana Department of Environmental Quality, even though the applicant is required to acquire a discharge permit, the applicant serves as no threat to any aspect of the river's quality. The proposed discharge is rig washwater and sanitary wastewater. It is my opinion that a letter of NO OBJECTION be issue to all interested agencies in reference to this matter.
