*RE: Saints Place – Preliminary Plat Application
Destrehan, Louisiana 70047
Basis Design – Drainage Impact Analysis*

Dear Mr. Tabb:

We are writing this letter to state that the final drainage impact analysis for construction approval for use with the above captioned development will show that the post-development stormwater runoff will be equal to or less than the pre-development runoff.

Thank you for the opportunity to provide this information to you. Please do not hesitate to contact our office should you need further assistance.

Respectfully,
Carubba Engineering, Inc.

Roy M. Carubba, P.E.
