#### WIND WINDER WENTER

Extreme colds can be dangerous for people, pets, plants and pipes. Be sure to keep yourself and others as well as your pets warm during these colds.

Can you help Wally find these winter weather words?

#### TRANSPERSON

The map below shows the track of a hurricane. The 4 points show the different locations of the hurricane before making landfall. Storms can be hard to predict, so cones are used to show all possible areas the storm could go.

- (1) Monday 8:00 PM
- Wednesday 7:00 AM
- 2) Tuesday 10:00 PM
- 4) Thursday 9:00 AM

#### MODE THE EXEM

During an emergency, you may need to make a quick decision. Being prepared will help you make the right decision every time.

Draw a line to match the decision with the hurricane position on Page 6.

#### EXERSIS VEIRENES

Sirens let us know when an emergency is happening. They can let us know if there is a "WATCH" or a "WARNING".

When you hear the sirens you should look for what the emergency is on your TV or radio and get prepared.

Sometimes you will hear the sirens when there is no emergency. Sirens are TESTED every first Thursday of every month and this may not be an emergency.

Where is your nearest emergency siren?

#### FREDDY FLASII FLOOD

Flash Floods happen whenever there is an excessive amount of rainfall in a short period of time. A flash flood "WATCH" means flooding could happen and a flash flood "WARNING" means a flood is happening or is about to happen. During a watch or warning, you should stay high and dry and alert to the news!

Help Freddy through the maze to get to higher ground!
