Thursday, November 6.*

**Send a photo with name, branch & rank to
publicinfo@stcharlesgov.net
by November 1, 2024.**

October is National Manufacturing Month

- The petrochemical industry specifically provides **\$267 million** in annual wages, which is significantly above the state's manufacturing average.
- Since 2022, over **\$4 billion** in new investments have been authorized, creating 250 new jobs with **\$21 million** in payroll.
- Manufacturers pay **\$229 million** in property taxes annually, which is **88%** of all property taxes in the parish. This directly funds our local services and infrastructure.
- Our local manufacturers also partner with the schools in our parish to strengthen STEM education and skilled trades. They also sponsor student and teacher development programs, creating pathways for long-term careers for residents.
